

INDEX TO VOL. II.

GEOMETRY OF THREE DIMENSIONS.

	Page
Investigation of certain properties of the ellipsoid. By <i>T. Weddle</i>	13
On symbolical geometry—continued. By <i>Sir W. R. Hamilton</i>	47, 130, 204
On the theory of involution in geometry. By <i>A. Cayley</i>	52
On the degree of a surface reciprocal to a given one. By the <i>Rev.</i> <i>George Salmon</i>	65
Note on the parabolic points of surfaces. By the <i>Rev. George Salmon</i>	74
Notes on descriptive geometry. No. II. By <i>T. S. Davies</i>	252
On conjugate hyperboloids. By <i>Thomas Weddle</i>	274

ALGEBRA.

On a problem in combinations. By the <i>Rev. Thomas Kirkman</i>	191
On the existence of roots of algebraical equations. By the <i>Rev.</i> <i>Harvey Goodwin</i>	224
On certain algebraic functions. By <i>James Cockle</i>	267

DIFFERENTIAL AND INTEGRAL CALCULUS.

On a certain symbolical equation. By <i>George Boole</i>	7
On the integration of certain equations in finite differences. By the <i>Rev. Brice Bronwin</i>	42
Evaluation of a definite integral. By <i>Francis W. Newman</i>	75
On logarithmic integrals of the second order. { Part I. Part II.}	77 172
By <i>Francis W. Newman</i>	
Note on the preceding paper.	236
On certain formulae for differentiation, with applications to the evalua- tion of definite integrals. By <i>A. Cayley</i>	122
On certain symbolical representations of functions. By the <i>Rev.</i> <i>Brice Bronwin</i>	134
On the differential equations which occur in dynamical problems. By <i>A. Cayley</i>	210
On the theory of elliptic functions. By <i>A. Cayley</i>	256

MECHANICS.

On the attraction of a solid of revolution on an external point. By <i>George Boole</i>	1
On principal axes of a body, their moments of inertia, and distribu- tion in space. By <i>R. Townsend</i>	19, 140, 241

MECHANICS—*continued*,

	Page
On the laws of equilibrium and motion of solid and fluid bodies. By <i>Samuel Haughton</i>	100
On a multiple integral connected with the theory of attractions. By <i>A. Cayley</i>	219
Notes on hydrodynamics. By <i>William Thomson</i>	282

OPTICS.

On the caustic by reflection at a circle. By <i>A. Cayley</i>	128
Note on the preceding paper	236
On the maximum or minimum property of incident and reflected rays	286

HEAT, ELECTRICITY, AND MAGNETISM.

On a mechanical representation of electric, magnetic, and galvanic forces. By <i>William Thomson</i>	61
On certain definite integrals suggested by problems in the theory of electricity. By <i>William Thomson</i>	109
On the forces experienced by small spheres under magnetic influence; and on some of the phenomena presented by diamagnetic sub- stances. By <i>William Thomson</i>	230
On a system of magnetic curves	240

MISCELLANEOUS.

Mathematical Notes	236, 238, 286
Solution of a problem from the Senate-House papers for 1847	238

\checkmark Notes and other passages enclosed in brackets [], are insertions made by the Editor.

The date of actual publication of any article, or portion of an article, may be found by referring to the first page of the sheet in which it is contained. The Author's private date is frequently given, at the end of an article.—ED.

ERRATA.

In the memoir "On a Multiple Integral connected with the theory of Attractions," in the denominator of the value of U given by the formula (14), p. 221, for $\Gamma(\frac{1}{2}n-q)$ read $\Gamma(\frac{1}{2}n+q)$, and in the next line for $\Gamma(\frac{1}{2}n+q)$ read $\Gamma(\frac{1}{2}n-q)$.
